Megasealed

TILING MATERIALS

Megaflex Adhesive

Tile adhesive

Flexible, cement-based adhesive used for wall and floor applications. Suitable over concrete, cement render, green screeds, fibre cement sheeting and plasterboard. Also recommended for internal and external applications, including bathrooms, kitchens, laundries, verandas and existing tiles. Megaflex Adhesive has a 10 year product warranty.

Megabarrier

Barrier to prevent water seepage

An epoxy barrier to eliminate rising moisture. An integral step in the application of a waterproofing system to a bathroom or balcony. Megabarrier is used prior to the application of a waterproofing membrane.

Megaguard

Waterproofing membrane

Applied to render and villa boards before tiling and grouting. Megaguard is applied to protect substrates from water damage. It's a unique two-coat membrane, the fastest drying ever developed.

Megaprime

Multi-purpose primer

A unique priming agent. Can be applied directly to tiles to enable maximum effectiveness of adhesives and waterproofing membranes. Can be used on any surface.
